5	Gary Higgins	ghiggins746@gmail.com	I raise a limited number of Scottish Highland cattle that are grass finished with no growth hormones or antibiotics. Studies state they are 38% lower in fat and 4% lower in cholesterol than other breeds.	402-450-3572	Beef		Scottish Highlander	1200 - 1400 pounds would be the range of the finished weight. 6	Bob Huenik	rhpigfarmer@yahoo.com	I finish my hogs in an open lot environment. Pork on general is higher in "heart healthy" monounsaturated fat but dirt or pasture raised hogs have meat that is higher in micronutrients, particularly fat-soluble vitamins E and D. The open access to sunlight also makes the meat richer in vitamin D.	402-318-8627	Pork		Various breeds	Typically 250 - 300 pounds.	Grain finished.
